

# Global experts

## Welding and coating services

CRC Evans is a leading provider of welding and coating pipeline services for the evolving global energy and infrastructure sectors.

Oil & Gas

Water

H<sub>2</sub>

Hydrogen

Carbon Capture

Nuclear

### **Regional and Global Operator Project Experience**

#### Middle East

- Aramco
- SWIC
- PDO
- ADCO
- KOC
- Qatar Energy, Qatar Energy LNG & NOC

#### International

- BP
- Shell
- Total
- Equinor
- Petrobras
- Woodside

# OUR CAPABILITY

As a recognised leader in the provision of field joint coating services and technologies, CRC Evans offers bespoke packages and customised equipment tailored to customer requirements.

## WELDING SOLUTIONS

### Welding Expertise

Over 90 Years history in welding  
Began automated welding in 1969  
Capabilities to weld pipeline  
4 - 100" OD  
Up to 100,000 welds per year  
Delivering with a right  
first time approach

### Semi and Fully-Automatic Welding

M500 Single Torch External  
Welding System  
P625 Dual Torch External  
Welding System  
Internal Welding Machine  
(Capable of welding 24-60" OD)

### Pipeline Equipment

Internal Line-Up Clamp  
Pipe Facing Machine  
Pipe Bending Machine  
Hydraulic Power Unit  
Hydraulic Clamps

## COATING SERVICES

### Surface Preparation & Surface Conditioning

Open and Closed Cycle Blasting  
Fully Automated & Semi-Automated Blasting  
Induction Heat  
Inverters

### Corrosion Protection

Fusion bonded epoxy (FBE)  
Heat shrink sleeves (HSS)  
Polypropylene fused field joint  
(spirally wound tape)  
Polypropylene and  
Polyethylene Flame Spray  
Multi-Component Liquid (MCL)

### PU Foam Infill & Thermal Insulation

HDPU Foam Infill  
Injection Moulded  
Polyurethane (IMPU)  
Injection Moulded  
Polypropylene (IMPP)  
Fused Insulating Jacket (FIJ)  
Half shells

# WELDING SOLUTIONS

CRC Evans provides the largest fleet of welding systems to major projects, regionally and across the international pipeline industry.

## Project delivery

Our welding project delivery services offer complete solutions from planning and design to execution and quality control. With certified welders, we ensure precision, safety, and timely completion, meeting industry standards throughout.

### What we provide

- Project management and support
- Procedures and qualification
- Rental, sales and services
- Training of personnel
- Wide project experience

## Expert solutions

Our welding solutions provide top-tier craftsmanship and innovative techniques tailored to your project. With skilled professionals and advanced technology, we ensure precision, durability, and compliance with industry standards for every weld.

### Specialist support services

- Trained quality technicians
- CRA and high-alloy Welding
- Expertise in high-capacity welding
- Heavy wall pipeline welding

# COATING SERVICES

CRC Evans has provided coating services to the energy sector for over 30 years and is a reliable partner for major projects around the world, making us globally recognised as the market leader in pipeline field joint coating and custom coating.

## Pipeline field joint coating

The services are focused on delivering a repeatable installation process, ensuring a high level of quality, whilst maintaining optimum daily production rates – faster commissioning and reduced pipeline construction costs.

- Project management
- Procedures and documentation
- Specialist application equipment
- Skilled personnel
- Supply of materials

## Custom coating

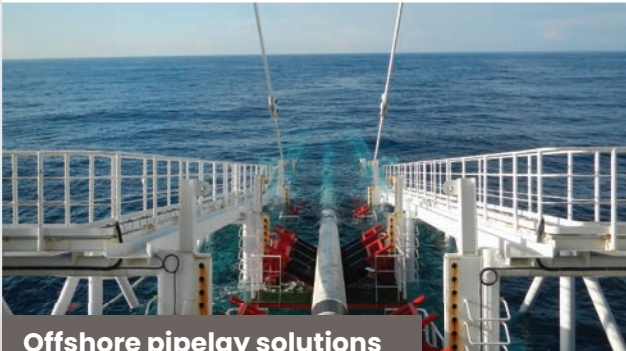

With over 30 years experience within the oil & gas coating industry, our expert engineering and technical team provides best-in-class solutions to protect and extend the life of subsea structures.

We utilise the most advanced custom coating materials and material processing techniques for spools, jumpers and other critical subsea infrastructure.

# WORK PACKAGES

We provide services across a wide range of pipeline related packages of work, supported by our experienced technicians and project managers. All work is delivered in accordance with project parameters, specifications and schedule.

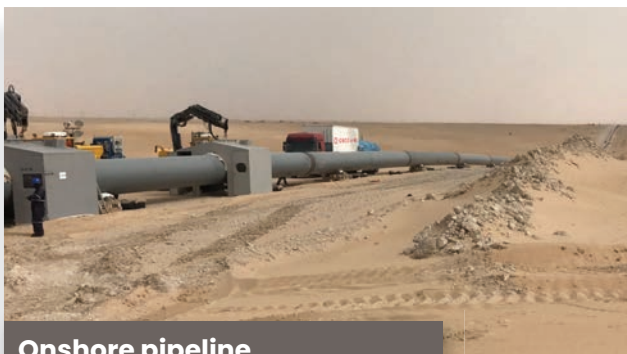

**Offshore pipelay solutions**

Delivering integrated welding and coating solutions for offshore pipelay, ensuring robust protection and seamless performance on the critical path.

**Spoolbase solutions**

Offering specialised welding and coating solutions for Spoolbase operations, ensuring high-quality pipeline integrity and efficiency for offshore projects.

**Onshore pipeline**

Providing expert welding and coating solutions for onshore pipelines, ensuring long-lasting durability and reliable performance in challenging terrains.

**Fabrication yard**

Delivering high-quality welding and coating solutions at fabrication yards, ensuring precision, strength, and protection for all structural and pipeline projects.

## Supported sectors:

Oil & Gas

Water

Hydrogen

Carbon Capture

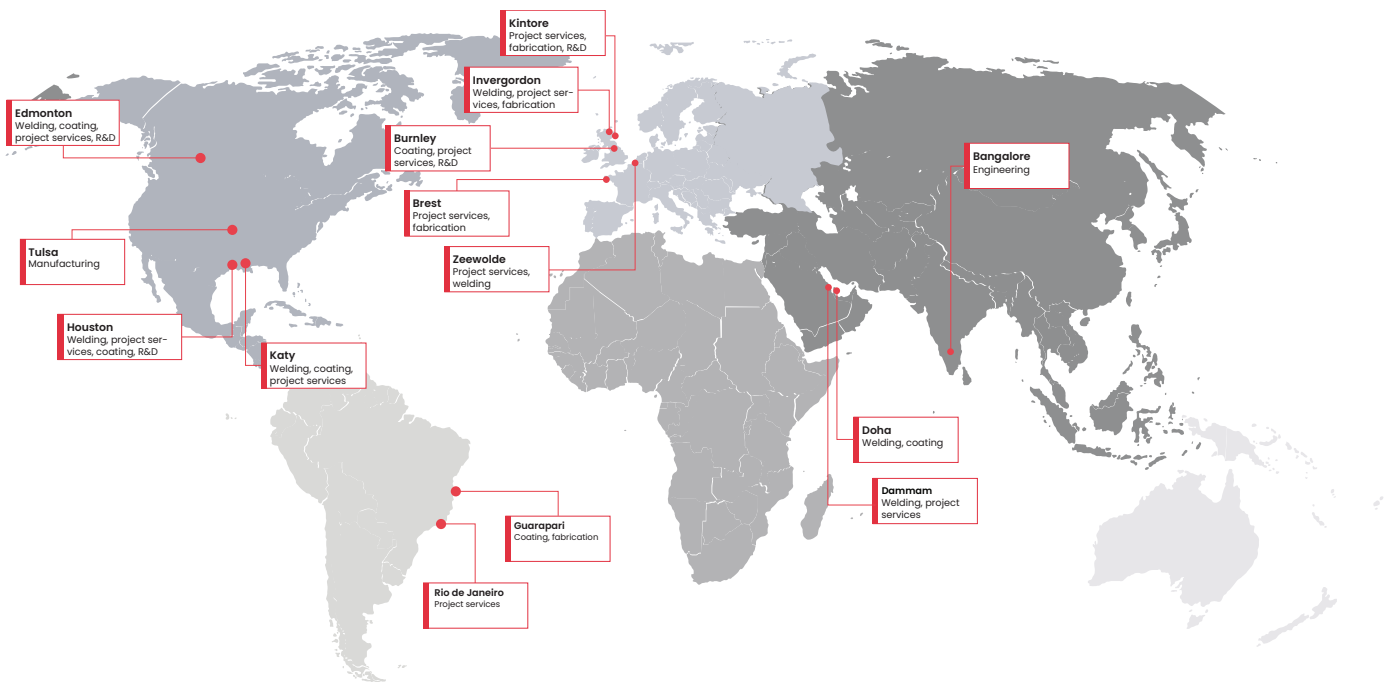

Nuclear

# WE OPERATE GLOBALLY

CRC Evans is a leading provider of welding and coating services, technologies and integrated solutions for the evolving global energy and wider infrastructure sectors.

We have more than 90 years' experience supporting critical infrastructure projects and a global team of welding and coating experts with the experience and knowledge to support our customers projects anywhere in the world.
